Instructions

A website wireframe is a mockup of a website. Following these steps will help build out a map of the navigation and main points of a new website design while adding in visual and interactive elements

Start Here

1. Briefly describe the goal of your website
2. Start with your header and main navigation at the top.
3. Add a hero section. What does your website promote?
4. Add additional sections and alternate the look and feel. Feature collections, an image gallery, or a content feed.
5. Wrap it up with your footer. Make sure to include a "Subscribe Now" sign-in box for email and any page links that you did not include in the main menu.
6. Incorporate other elements or sections with the main goals for your website in mind.
7. Collaborate with your team
